

Enjoying your balcony

SAFELY

We want you to enjoy your balcony, but we also want to keep you, your home and your neighbours safe from fire. **Follow these simple steps to stay safe:**

Keep your balcony free

of any flammable items or materials – 1KG of plastic is equivalent to 1KG of fuel!

Never store gas cylinders

on your balcony, even in the winter.

Do not use

barbecues, chimineas, fire pits or patio heaters on your balcony.

Do not smoke

on your balcony. If you must, stub cigarettes in a closed metal ashtray. Never drop cigarettes on or over the side of your balcony.

Never use or store

fireworks anywhere in your home.

You can find more information on our website.
